[Keys to Comprehension](#)

John Steinbeck said, "Reading is the greatest single effort that the human mind undertakes, and one must do it as a child." There are many factors that contribute to the understanding of written material. All of these form the basis for the development of comprehension skills. Susan Zimmermann and Chryse Hutchins, in their book for parents, 7 Keys to Comprehension, suggest several things that good readers do to make meaning from what they read. Other "keys" have been added to this list based on current research in the field of reading

comprehension. No one key is more important than the others; they all work together in the creation of a skilled reader.

[Comprehension Continuum](#)

[Edutopia](#)

Edutopia provides you with various resources such as blogs, videos, articles, sample lesson plans, and much more on various trending topics in education.
